

Rocket® UniData®

Deliver fast, flexible, and secure applications with low overhead

Rocket® UniData® provides everything you need to develop and deliver secure, stable, data-driven applications that scale and evolve with your business needs. The platform powers thousands of business-critical operations across industries including finance, healthcare, manufacturing, distribution, retail, and higher education. With UniData you get the performance, reliability, and security of an enterprise-class application, with low total cost of ownership.

Benefits/Features

Performant

Create, deploy, and maintain high-performing business applications, and get faster ROI.

Low TCO

Minimize ownership costs with simple administration and light hardware requirements.

Secure

Implement industrial-strength data security.

Compliant

Audit Logging capabilities let you easily establish configurable audit histories of assets and events so you can demonstrate compliance.

Reliable

Ensure business continuity with robust HA/DR configurations.

Modern

Using free tools, add a modern web front end and integrate it with other systems, such as third-party apps and hardware like tablets and smartphones.

What our customers have to say

This product answers almost every audit question. The Audit module can be configured from high-level system-wide activity to specific user file-level access and change logging, to program and process logging. If you can think of an audit question, UniData 8.2 Audit can be configured to provide the answer."
