Rocket® Terminal Emulator Jump Start

Customer Solutions Engineering macro conversion service package

Service benefits:

- Fast and smooth conversion from your incumbent emulator

- Access to proprietary conversion tools built by experts experienced in macro conversion projects

- Expert assistance and insights for getting more value from your emulation investment

- Accelerated path to your self-sufficiency in conversions and operations

Accelerate Rocket Terminal Emulator conversion and deployment

The Rocket Customer Solutions Engineering team is here to help you accelerate your success with Rocket® Terminal Emulator. Whether it's a simple DIY conversion and deployment, or an advanced conversion with complex macros and scripting dependencies on external programs, we'll get you up and running quickly. The Rocket Terminal Emulator Jump Start service package is modeled after thousands of successful customer engagements and backed by proven deliverables. Our technical consultants are experts in identifying your needs and bringing a modern emulation replacement to production quickly.

The Jump Start package is unique because we're focused on enabling you and your team with tools and training—not simply converting macros.

With Jump Start we will:

- Review the macros you provide, identify the correct conversion tools, and select up to ten sample macros to use for training.

- Provide our proprietary Terminal Emulator migration tools (free to Jump Start customers).

- Conduct in-depth, online training for our Terminal Emulator migration tools.

- Offer hands-on training sessions using the sample macros as teaching tools.

- Demonstrate and practice macro/script conversions that represent the majority of cases.

- Provide up to 16 hours of mentoring to reinforce best practices and develop skills.

With Rocket Terminal Emulator Jump Start, you and your team will be able to convert the vast majority of your macros rapidly and automatically. This frees up time and resources to address manual cases and enables you to migrate away from your existing emulator as quickly as possible.

Conversion and Deployment add-on and consulting packages

Rocket Terminal Emulator Jump Start enables organizations to rapidly become self-sufficient in converting their own macros/scripts. However, when needed, Rocket Solutions Engineers can convert scripts for you with our Conversion and Deployment packages. Each package includes script conversion, knowledge transfer, and integration testing sessions.

UP TO 100 UNIQUE MACROS/SCRIPTS* COMPOSED OF…	Basic	Moderate	Advanced
Users recorded keystrokes	✓	✓	✓
Native scripts from existing emulator	✓	✓	✓
MS Office integration (Excel, Access)	✓	✓	✓
HLLAPI Integration with 3rd party applications	✓	✓	✓
Visual Basicfor Applications (VBA)		✓	✓
Custom applications and programming languages (Visual Studio, C/C++, Visual Basic [VB] C#, and VB in .NET framework)			✓
Static or dynamic loading of HLLAPI DLLs			✓
Java scripts used in web pages			✓

*Conversion of macros/scripts in excess of 100 can be purchased in blocks of 50 macros/scripts

We also offer consulting for customers who want us to fully manage their conversion; just ask for a quote for a custom engagement.
